

Awards and Recognition

After stepping into offshore wind farm industry, IOG has expanded the fleet and whole organization continuously. With the joint efforts of all our partners, we execute a full range of corporate social responsibilities actively and commit to sustainable development at all aspects.

On the way to promote energy transition in Taiwan, we are very honored to be awarded reorganization of sustainable development from internal institutions and even abroad, after passing strict review standards, which showed our efforts and determination on sustainable governance. One of our vision is to let more people have chances to learn more about offshore wind farm industry, and start to care about our environment, and see the potential of the growing local wind power industry chain in Taiwan, through supporting corporate sustainable development.

IOVTEC-the Winner of BCCT 2020 Green Energy Award

IOVTEC has awarded the winner of 2020 Green Energy Award by BCCT

British Chamber of Commerce Taipei, BCCT, holds Better Business Awards every year. The annual BCCT Better Business Awards recognizes individuals and enterprises in Taiwan for their outstanding effort in Responsible Business. This year, the award targets 5 categories, including *Green Energy Award*, *Business Leader of the Year Award*, *Corporate Social Responsibility (CSR) Award*, *Social Enterprise Award* and *Diversity Award*. And it is the very first time that *Green Energy Award* is listed as one of the rewards in Better Business Awards. With an aim to encourage and support the growth of outstanding renewable energy-related companies in Taiwan. And raise the awareness of renewable energy to other industries, academia and general public.

It is our honor to be invited to participate in the Award Ceremony held at the Regent Hotel on September 30 as one of the finalists. And we are deeply honored and grateful to have been announced as the winner of 2020 Green Energy Award at the ceremony. As one of the first local companies that entered the offshore wind farm industry, we have always been committed to building local offshore wind supply chain. We go full speed on establishing a solid wind power knowledge system to cultivate more Taiwanese wind power talents. We are very happy to be recognized through winning this award. Together with BCCT, we want to invite more and more entities and individuals to have a glance at current development of renewable energy industry. We aim to promote sustainable environment to build a better future for the Earth.

TIWTC awarded the TOP of GWO Certified Training Provider in Asia Pacific

TIWTC have announced to be the highest GWO certification distributor in the first half year of 2020

Since the establishment of Taiwan International Windpower Training Center (TIWTC) in September 2019, business started to be on the track in 2020. The number of trainees also increased continuously. This year, it is a great honor to be awarded as the highest certification distributor in the first half year of 2020 in Asia Pacific by Global Wind Organization(GWO).

TIWTC obtained the qualifications of Basic Technical Training Course (BTT) in 2018 and Basic Safety Training Course (BST) in 2019 from Global Wind Organization(GWO) respectively, and thus, became the first GWO training center in Taiwan. In addition to the courses mentioned above, TIWTC also provide professional training courses for wind farm developers, wind turbine manufacturers and wind farm maintenance

operators, etc. In order to increase competitiveness, TIWTC also introduces diversified training courses actively. To increase the scope of our training business, Enhance First Aid, Advance Rescue Training, HUET Training Course, and Marine Crew Simulation Training are also included in our future plan. Customized Courses are also provided depending on the requirement of our customers.

With the gradual rise of offshore wind energy in Asia, talents cultivation has become an indispensable part of the whole industry chain. TIWTC also has planned to set some development strategies to enter to other markets in Asia. We aim to provide GWO training and certified consultants by building an international wind power training center brand and deliver the brand globally. With an aim to make Taiwan be the center of offshore wind power development base in Asia.
